

SEO & Digital Marketing

Get found. Stay found. Convert.

What it is

Search, local, and paid marketing working together to put a business in front of customers who are already looking — and turn that attention into qualified leads. One number matters: leads.

How it works

1

Audit

Where they rank +
keyword opportunities

2

Optimize

On-page, technical, and
local SEO

3

Amplify

Content + targeted paid
campaigns

4

Refine

Track rankings, traffic,
and leads

Who it's for

- ▶ Businesses invisible on Google
- ▶ Owners relying only on word-of-mouth
- ▶ Local shops not showing in map results
- ▶ Anyone whose competitors outrank them

How to pitch it

- “ Show up the moment a customer searches for what they sell.
- “ Quick wins from local + technical fixes, compounding over time.
- “ We report on the only number that matters — qualified leads.

Common objections

“SEO takes forever to work.” — Local and technical fixes drive early wins; the bigger gains compound month over month.

“I just run ads instead.” — Ads stop the moment you stop paying. SEO builds an asset that keeps delivering.

Refer a business that needs this.

You earn 10% of their first invoice (min \$50).
